Core Training Certificate of Achievement

Carole came to SummerField Suites in 2002, bringing with her over 30 years of experience in business administration. Her work history included the field of telecommunications for such companies as MCI, RCA, and GE. Carole was one of the founders of Chicago Fiber Optic which was later sold to MCI.

A hospice organization cared for Carole's mother during the end of her life. The experience was so positive that she felt the need to change direction in her career path, and she found her way to SummerField Suites.

Carole enjoys all sports, decorating and gardening. Her husband, Dan, is Project Manager for Trans Core.
